

DPD 6533-59

24 September 1959

MEMORANDUM FOR: Chief, Developments Branch, DPD-UD/P

ATTENTION:

SUBJECT: Radio Proposal for Helio Model 500

REFERENCE: DPD Memorandum 6446-59, dated 23 September 1959,
subject as above

25X1

1. In reference to the attached memorandum the following is submitted:

a. Regarding paragraph 1: Noted.

b. Regarding paragraph 2: The configuration described is generally in accordance with the desires of the Evaluation Board which consisted of representatives from the Operations Branch, the Technical Services Staff, and the Office of Training.

c. Regarding paragraph 3: The proposed equipment is considered adequate to meet minimum USAF communication requirements for light twin instrument type aircraft. Eventually these aircraft will be assigned to the Eglin Domestic Air Unit and should not require re-configuration. In addition, it is our understanding that all the black boxes can be quickly removed when operational requirements require maximum ranges and heavy payloads. The exact VHF frequencies for the secondary VHF system will be obtained from Col. Theodore Erb, of the Eglin Domestic Air Unit, and passed to the Developments Branch.

25 YEAR RE-REVIEW

2. It is recommended that action be taken to procure and install the ARC equipment as described in your memorandum.

SIGNED

STANLEY W. BEERLI
